

# ORTO

is an aluminum built-in system with a unique design and versatile use, giving great freedom in interior design. The system uses a narrow supporting profile with a slender line as a base, which gives the structure lightness and smooth appearance. Orto is ideal as a structural element of modern and open concept structures and shelves for the living room, bedroom, wardrobe or kitchen. The system can be equipped with shelves, drawers, rails and cabinets, which gives you a wide range of possibilities for creating original furniture in several combinations.
